ORBI TRADE ADVANTAGES:

DMA & CFD Type

DMA (Direct Market Access) & CFD (Contract For Difference) You get smaller spreads, and faster platform execution (no requotes) for your order goes Direct to Market or Liquidity Provider.

1 Second Execution on Non-Farm-Payroll and Other News

ORBI TRADE is the only broker in the world that provides real-time execution speed even only 1 second during Non-Farm Payroll and several other news.

59 Minutes Deposit 59 Minutes Withdrawal

ORBI TRADE guarantees deposits and withdrawals of profit will not have problems with the data records that you have provided are complete and correct.

Automatic Order Fill

All orders that you place / open at ORBI TRADE will be directed directly to the Liquidity Provider without any intervention from the Dealing Desk

ORBI TRADE GUARANTEE

Basic Consequences:

- a. Wrong Quote due to network damage or freeze
 - At this stage, the client must agree about normal errors that may come periodically.
 - Errors that are considered normal are the freezing price under 30 minutes.
 - If more than 30 minutes of silent price, Orbi Trade can seek the best win-win solution, which will be checked first.
 - The solution can be in the form of an annual or adjustment equity.
- b. Wrong quotes in any form will be deleted, either detrimental or beneficial to the client
- c. Each client is required to set pending limits (Stop loss and Profit Taking) as an effort to facilitate problem-solving. If there is no evidence of closing a position in the journal or no limit order, then ORBI TRADE has the right to take a policy not to provide compensation for something that cannot be proven.

SPECIAL MARKET CONDITIONS AND FORCE MAJEURE

ORBI TRADE reserves the right to determine that there are emergencies or market conditions that are extraordinary and unpredictable. These conditions are included in the suspension or closing of the market. However, ORBI TRADE will use its best efforts to correct reproducible errors and defects in the standard ORBI TRADE service.

1. Price Stopped Moving / SERVERS DOWN

In exceptional market conditions or force majeure, for example, prices are suspended/frozen / server is down / error, ORBI TRADE will only accept order liquidation.

The client must send a liquidation request to WhatsApp +1 737 232 2299 or +62 8 111 717 999 (Bahasa) using the following format:

- Name:
- Email:
- Account Number:
- Error Documentation Video:

The liquidation price will be taken from the current price source from the liquidity provider.

ORBI TRADE GUARANTEE

Additional notice:

- When the price is frozen for no more than 8 minutes, the condition used is the last price before the freeze is used as the liquidation price.
- When the price is frozen for more than 8 minutes, the liquidation price will be taken from the liquidity provider (Saxo Bank).
- When there is an ongoing trading position that has not received the liquidation request, it will still be running before the current market price.
- When the price is stopped / the server goes down, all kinds of pending orders and new orders will be considered as cancelled orders.

2. WRONG QUOTES / INCORRECT PRICE QUOTE

When a transaction occurs based on a WRONG Order, for example, an incorrect price, then ORBI TRADE has the right to make corrections/withdrawals depending on the market price at that time.

3. ARBITRAGE TRADING

ORBI TRADE does not allow arbitrage trading. Arbitrage trading is considered exploitation, a violation of trade laws and would be unfair to clients. Therefore, arbitrage trading is strictly prohibited. ORBI TRADE reserves the right to revoke arbitrage transactions and/or to the extent prohibiting clients who have arbitrated trading

All parties fully understand that trade orders and trade details are generated by the program and not by ORBI TRADE. ORBI TRADE is not responsible for any program errors or malfunctions, including mechanical or communication line failures, system errors, pricing errors, freezing rates, data failures or any cause beyond its control. The Client acknowledges that any orders that have been executed during this condition will be considered cancelled.

ORBI TRADE GUARANTEE

In addition, ORBI TRADE is also not under any circumstances responsible for any indirect or consequential loss, including lost profits, loss of goodwill, or lost profit opportunities.

The Parties agree that the limits of liability contained in this clause have been subject to commercial and fair, and reasonable negotiations with respect to the circumstances which were, or should have been, known or contemplated by the Parties regarding these trade terms.

If there is an issue or there is an important question, then don't hesitate to contact ORBI TRADE if a trader has any questions or complaints. We will gladly reply with a Trading Journal Report and historical Tick Price from our server. Contact us on WhatsApp +1 737 232 2299 or +62 8 111 717 999 (Bahasa).

TRADING REQUIREMENT

BRIEF DESCRIPTION

1. TRADE SIZE

Types of trading instruments that are traded according to the offer (buy or sell) start from micro account size (0.01 LOT)

Example:

In micro-lots (0.01 LOT), one point of a currency pair based in US dollars is equal to \$ 0.1, compared to \$ 1 for trading mini lots (0.1 LOT) or \$ 10 for trading standard lots (1 LOT).

2. MARGIN DEPOSIT

To open a real account at ORBI TRADE, you need to make a deposit. The minimum deposit for each account applies the following rules

- a. \$ 50 for Recreation account
- b. \$ 1,000 for Professional account
- c. \$ 5,000 for Syariah account
- d. \$ 50,000 for the Signature account

3. CHANGE PASSWORD WHEN OPENING A TRADING ACCOUNT FOR THE FIRST TIME

When you first open a trading account, you will be given access to your account password by your admin and/or trading advisor. Please note that you **MUST REPLACE** the PASSWORD IMMEDIATELY the password of your choice, which is certainly easy to remember. The following is a tutorial for changing the password for Meta Trader 5:

- Select "Manage Account"
- Select "Change Password"
- Select "Change Master Password"
- Enter Your Old Password & Enter a New Password (which is easy to remember)
- Click "Next"
- Done

TRADING REQUIREMENT

4. BID / ASK SPREADS

The bid and ask prices of trading instruments on the platform are the prices of the liquidity providers. In abnormal market conditions such as before and after the release of major economic data, during periods of volatile market conditions or times of illiquidity and several other factors. The bid and ask prices also depend on the market opening, at the beginning of the Asian time zone, at the end of the New York time zone, as long as the value date changes, the spread may be wider.

Furthermore, we will inform you about the Widening of Spreads that often occur in Liquidity Providers during Market Closing / Opening. Especially Exotic Pairs (Pairs that are not against the USD) usually experience widening spreads (30 - 60 pips) far from normal spreads in stable market conditions. Therefore, as much as possible avoid Over Night for this pair's Exotic Position because Stop Loss can be affected during Over-Night.

UNDERSTANDING SPREADS & HOW SPREADS AFFECT YOUR TRADING

For example, if you look at the EURUSD chart it reached the price of 1.2600 (take profit for the short term) but your order did not stop or close. It is commonly known as the market spread. Please also note that the price on the chart is a bid price and not an ask price. In order for the take profit at 1.2600 to be achieved, the Euro-Dollar pair must hit the price at 1.2600 + the market spread. Meanwhile, to find out the stop loss number, the price must reach 1.2750 + the market spread.

If the spread is 2 points, then the take profit for the short term is 1.2602 with a stop loss when the price reaches 1.2752.

Now, what happens if the spread widens by +10 points?

Then the price is at 1.2612 so that the take profit will be obtained and can stop trading. Additionally, the price has to reach 1.2760 for the stop loss to be set.

Notes:

If a trader is still unsure about the Take Profit or Stop Loss point or level, it is advisable to make a decision to take or not before the provisions of the rules run, so it is advisable to contact ORBI TRADE via WhatsApp to WhatsApp +1 737 232 2299 or +62 8 111 717 999 (Bahasa).

We will be happy to receive and maintain the journal report and history of price tick on our server.

TRADING REQUIREMENT

5. ORDER EXECUTIONS

All standard types of orders on the market are available on your MT5 platform, namely market execution, limits and stops. In addition to the Trailing Stops, where the Stop level moves in line with the market price and is supported for all types of Stop orders.

All stop and limit orders can be placed as:

- **Day Order** this order can be categorized as an order that expires automatically at the end of the working day when the order is placed
- **Good Till Canceled (GTC)** This order is adjusted to the conditions the order is still running until the cancellation is done manually

6. MARKET ORDER EXECUTION

Currently, the main method used to execute markets via the ORBI TRADE platform is "Market Orders Execution". Market orders will always be listed at the current available price in a certain amount, but it should be noted in advance because it can result in slippage.

In abnormal market conditions such as before and after major economic news releases, it is said that market conditions are unstable. Trading transactions may not be executed at all (off-quote) due to the unavailability of the Automatic Order Fill volume.

7. PENDING ORDER

All pending orders (Buy Limit, Sell Limit, Sell Stop, Buy Stop, Take Profit & Stop Loss) will be executed by the market price at open.

For example: You are requesting a sell stop order on Dow Jones Index at 33,000. When the next price of DJI at 31,000, Then your order will be done at 31,000.

TRADING REQUIREMENT

Other Important Notes:

ORBI TRADE has the right to make corrections/cancellations of transactions according to the current price with the following conditions:

- a. An error occurs in exceptional circumstances such as a highly volatile market before or after a news release
- b. It occurs when a transaction is based on a Wrong Quote, for example, an incorrect price when the market is running.
- c. All of the above provisions will be checked before taking action.

8. INTEREST / SWAP

An interest/swap rate is the overnight interest or rollover (earned or paid) for holding positions overnight in forex trading. Each trading instrument has its swap fee and is measured based on the volume used.

An interest/swap rate is subject to change depending on fluctuations in the country's primary interest rate and can be calculated daily at the close of the New York market. In addition, there is an additional swap of three times the average amount and occurs every Wednesday to compensate for the swap fee on Saturdays and Sundays when the market is closed.

9. ADJUST ROLL-OVER

For Customers with Free Swap Account, there is an Adj Roll Over Fee. This Roll Over Adj is a replacement fee for Swap charged for Free Swap Account, and this fee is only charged for transactions that exist at the end of the month.

So if there are no transactions open at the end of the month to the beginning of the following month, this fee is not charged, so we recommend that for Free swap accounts, not to hold positions at the end of the month

(Average Spread x lot) + Commission

TRADING REQUIREMENT

Study Case:

a. Open Sell EURUSD on November 30th at 1.13736 (1 lot)

Spread EURUSD 8 Pips = 8 Pips

Commission = \$30

(Spread x lot) + Commission

$(8 \times 1) + \$30 = \38

Standard Operating Procedure for Debiting Adjust Roll Over

1. The Adjust Roll Over fee will be deducted from your Free Margin at the end of the month at the market close.
2. If the funds available in Free Margin are insufficient, we will contact you to top up the required amount of funds.
3. Top-up takes up to 5-7 trading days.
4. If you do not Top Up within that time period, the floating positions will be closed one by one (First in, First Out) until the funds available in your Free Margin are sufficient to cover the Adjust Roll Over fee.

10. LEVERAGE

The forex market's main benefit is offering the highest leverage (lowest margin) of various products. It means that all traders can trade in the global market, which cannot do in other financial worlds.

There are two types of leverage in ORBI TRADE that will be an offer to all clients:

- a. Leverage 1: 200 is available for Professional, Syariah, and Signature Accounts
- b. Leverage 1: 500 is only available for Recreation Account

TRADING REQUIREMENT

11. HEDGING

Hedging / Locking is a situation where there are two opposite trading positions on the same currency pair. When this happens, the margin requirement for each class is calculated to be 50% of the standard margin requirement.

Example:

- Long position of 0.1 lot of EUR / JPY
- Short position of 0.1 lot of EUR / JPY

Typically, the margin requirement for both positions is \$ 100, but in this case, the value of the margin requirement for both parts is \$ 50

12. MARGIN CALL

Metatrader5 will trigger a margin call when the margin level on the account reaches 100%. Margin levels can be found in the Trade tab menu in Metatrader5.

13. STOP OUT (AUTO-CUT) LEVEL

Whenever the margin level reaches 30%, Metatrader5 will automatically partial close for all trade position to avoid more significant losses.

14. GAP TRADING

A gap refers to the area on a chart where no trading activity has taken place. It will appear as an asset's price moves sharply up or down with nothing in between, meaning the market has opened at a different price to its prior close.

TRADING REQUIREMENT

EFFECT ON THE MARKET GAP ON YOUR ORDER

Sometimes, there are instances where the price "jumps" from the close point to the open point. Futures prices for both Gold, Forex, & index will follow the real market price, represented by the liquidity provider. So when we hit 1187 on the 27th minute, it's done at a different price because, at that minute, the price jumps ticks. Especially if it is NON FARM PAYROLL or other Hyper News, with STP, your system can certainly be done at a Best Market Price like Indonesian Stocks without Requote, but the price must follow the market price.

So if you experience GAP in a trade, your done price will follow the last price. For example, you BUY STOP GOLD at 1270, while the cost of running GOLD when you enter your Pending Order is at 1260. Five minutes later, the GOLD price suddenly jumps to 1275, so if your BUY GOLD Open Order is at the price of 1275, not at 1270 (even though you have a GOLD pending order at the expense of 1270).

Like other types of orders, be it BUY LIMIT, SELL LIMIT, SELL STOP, TAKE PROFIT, or STOP LOSS. The existence of GAP in the market, which we cannot predict like a double-edged sword for traders, can lead to big PROFIT traders and cause traders to LOSE too. Therefore, you must be strict in implementing MONEY & RISK MANAGEMENT if you want to become a PROFITABLE trader.

TRADING INSTRUMENT & DETAILS

FOREX

Forex trading involves buying and/or selling one foreign currency against another. Forex trading is a market with a turnover of more than 4 trillion dollars a day and is available for trading almost 24 hours a day.

SPEIFICATION

Contract Size	: \$2
Margin Rate	: \$20
Commission	: - Fraction 1,2,5 = \$30/Lot - Fraction 10 = \$40/Lot - Fraction 25 = 0.5%
Swap Long/Buy	: -\$8
Swap Short/Sell	: -\$2
Min Open Transaction	: 0.01 Lot/ Account / Symbol
Max Open Transaction	: 2 Lot/ Account / Symbol
Max Floating Transaction	: 2 Lot/Account/ Symbol
3 Days Swap	: Friday
Settle Price	: Close Price (Bid & Ask)

FRACTION CHANGES:

Fraction can be change according to stocks price and if there is a change in fraction shift based on the Bid price, when Bid price changes to next or previous fraction. Therefore, changes to stops/limits and securities will occur when the market closes according to the session.

COMMISSION CALCULATION

Open Price x Lot x Contract Size x 0.5%

Example:

- Fraction 1,2,5 : BUY ACES 1 LOT at 1000 | Commission = \$30
- Fraction 10 : BUY ADRO 1 LOT at 2820 | Commission = \$40
- Fraction 25 : BUY AALI 1 LOT at 12675 | Commission = (12675 x 1 x 2 x 0.5%) = \$126.75

TRADING INSTRUMENT & DETAILS

CFD INDONESIA STOCKS

PENDING ORDER

All pending orders (Buy Limit, Sell Limit, Sell Stop, Buy Stop, Stop Loss and Take Profit) will follow the following rules:

1. Expiration (validity period) Pending Order for new position is Good Till Today (include SL/TP)
2. If Market Holiday or trading hours are closing, all Pending Orders for new positions and liquidation positions will be deleted.
3. Expiration (validity period) Pending Order for liquidation position is Good Till Today (include SL/TP)
4. Pending order limit is 3x Fraction

MARGIN REQUIREMENT CALCULATION:

- Single position : $\text{Lot} \times \text{Open Price} \times \text{Contract Size} \times \text{Margin rate} : \text{Leverage}$
- Hedging : $\text{Lot} \times \text{Average Open Price} \times \text{Contract Size} \times \text{Margin rate} : \text{Leverage}$

Notes : Average Open Price = (Open Price Buy + Open Price Sell) : 2

SYMBOL

The active Indonesian CFD symbol is the additional symbol "IDX"

Example :

BBRI = Only to close previously open transactions

BBRI.IDX = Able to open or close the latest transaction

TRADING INSTRUMENT & DETAILS

CFD INDONESIA STOCKS

PROFIT/LOSS CALCULATION:

(SELL-BUY) x Lot x Contract Size

ACCOUNT TYPE TO USE:

1. Profesional
2. Sharia
3. Signature

SWAP CALCULATION:

(Settle Price Bid or Ask x Lot x Contract Size x (Long or Short) : 100) : 360

Example :

Buy ASII 1 Lot at 5475 | Sell ASII 1 Lot at 5450

Settle Price : (Market Close Price)

Bid = 5400 | Ask = 5425

Swap Long

$(5425 \times 1 \times 2 \times -8 : 100) : 360 = \$-2,4 / \text{Day}$

Swap Short

$(5400 \times 1 \times 2 \times -2 : 100) : 360 = \$-0,6 / \text{Day}$

Notes:

- *3 Days Swaps are charged every Friday; trading positions placed on Friday will be counted as three swap days due to paying for Saturday & Sunday swaps. You can trade CFDs on the Indonesian Stock Market; trading on the CFD Market allows you to Short Sell and take profits when the stock price drops.*
- **All CFD Stocks transaction will be swap charged**
